## EDUCATION

### San Jose State University

San Jose, CA

*Bachelor of Science in Computer Science, Dean's Scholar*

*Aug. 2023 – May 2027*

- Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Computer Networks, Object-Oriented Design, Operating Systems, Information Security, Artificial Intelligence

## EXPERIENCE

### Google — YouTube

May 2026 – Aug. 2026

*Software Engineer Intern*

*Mountain View, CA*

- Owned design & development of a feature surfacing Partner Manager information for **700K+** top creators in Creator Studio (desktop and mobile), addressing a **40%** email non-response rate
- Architected & deployed a C++ microservice using gRPC & Protobuf to fetch and serve creator support data
- Engineered lazy-loading server-driven UI pattern to fetch data asynchronously, preventing additional latency
- Leveraged Antigravity to navigate legacy cross-team codebases & author tests with 100% coverage
- Migrated a legacy component to modern TSX via a wrapper routing legacy/modern versions for rollout
- Configured A/B testing feature flags to ensure a phased rollout of the Partner Manager visibility feature

### TwinMind

May 2025 – Mar. 2026

*Full-Stack Engineer Intern*

*Menlo Park, CA*

- Built a Next.js web app from the ground up, serving **5,000+** users; migrated existing backend-hosted pages into the new app and routed legacy links to preserve continuity, establishing it as the primary surface for new features
- Engineered Auth0-to-Firebase auth migration, implementing token exchange logic to preserve session continuity, preventing forced sign-outs; served as reference flow for migration across iOS and Chrome Extension
- Implemented server-side caching for public pages with UUID-scoped cache keys, reducing response times by **~50%**
- Published npm React component library with CI/CD via GitHub Actions, standardizing UI across 2 codebases

### Cooledtured Collections

Nov. 2024 – Apr. 2025

*Software Engineer Intern*

*Bloomington, IL (Remote)*

- Built frontend for an interactive engagement page, implementing quiz and poll UIs with leaderboards using Firebase Realtime Database, and integrated Firebase Auth with role-based admin access control
- Authored onboarding docs and video walkthrough, cutting intern setup time from **1+ hr to 5 min**

## PROJECTS

### FindMyProfessors | *Java, MySQL, Node.js, JSP*

Jan. 2026 – May 2026

- Designed & seeded a **15-table** MySQL schema with **8,000+** entries of data sourced via Node.js and GraphQL
- Designed backtracking algorithm to generate all conflict-free section combinations across user-selected courses
- Developed auth system using jBCrypt hashing & admin panel for course catalog management

### StudyBuddy (1st Place, SCE Hacks) | *React, Node.js, OpenAI, Canvas*

Sept. 2025

- Led team to win **1st place overall out of 40 teams** at San Jose State University's SCE Hacks
- Developed a full-stack web app to remind students of coursework & events through personalized daily SMS
- Integrated Canvas API for coursework, OpenAI API for personalizing text, Textbelt API for SMS delivery

### ChillGuy.ai (2nd Place, Hack for Humanity) | *React, Node.js, MongoDB, Twilio, ElevenLabs*

Feb. 2025

- Won **2nd place overall out of 50+ teams** at Santa Clara University's Hack For Humanity
- Developed an AI-powered voice agent that schedules & initiates wellness check-ins via phone calls
- Integrated Google OAuth and Google Calendar API to sync user schedules seamlessly

## TECHNICAL SKILLS

**Languages:** Java, Python, C, C++, SQL, TypeScript, HTML, CSS

**Frameworks:** React, Node.js, Next.js, Express, Flask, FastAPI, TailwindCSS

**Technologies:** Git, Docker, gRPC, Protocol Buffers, REST APIs, AWS, GCP, PostgreSQL, MySQL, Redis
